PROFILE

A Master Data Analyst, graduate in data engineering and business intelligence, actively seeking opportunities in Business Intelligence and Data Analytics. I'm enthusiastic about data science, especially considering how quickly technology is changing the profession. I'm passionate about technology, innovation and big challenging task, and I will be honored to be part of an organization that deeply cares about its employees and customers.

EDUCATION

Computer Science Teacher Certificate,

Institute for Teacher Training – Marrakesh

2021 - 2023

Master, Big Data Analytics & Smart Systems

Sidi Mohamed Ben Abdellah University - Fez

2018 - 2020

Bachelor of Fundamental Studies in Mathematics and Computer Science

Moulay Ismail University - Meknes

2015 - 2018

Employment history

High School Computer Science Teacher

2023 – Current Job

Duties: Instruct students on how computers work, including the basic science and mathematics behind their operation and the hardware and the software built on those foundations. Teach how to write computer programs and algorithms. Keep records of grades, grade papers, and perform other administrative duties as needed.

SKILLS

Data Visualization

Web Scraping

Machine Learning

Java

Python

Tableau

Hadoop

R

Microsoft Excel

Critical thinking and problem
solving

Communication Skills

Probability and statistics

Text mining

Cleansing and preparing data

Deep learning

Linear algebra

Computer vision

LANGUAGES	English	Highly proficient	Arabic	Native speaker
	French	Highly proficient		

PROJECTS

1. End-of-study project: Imaging detection of the state of health of poultry
Environment: Convolutional Neural Network, YOLO Object Detection Algorithm, SSD Object Detection Algorithm, OpenCV, Google Colab
2. Project Spark: Cluster analysis on Uber event data, detection and visualization of popular Uber locations
Environment: Apache Spark
3. Big Data Project: Recommender System for Netflix: Studying and Predicting ratings Environment: Linux (Ubuntu), Hadoop, Spark, MLlib, Jupyter Notebook, Pyspark
4. IoT project: Connected weather station using Raspberry pi
Environment: VNC Viewer, ThinkSpeak, sensors, Python
5. Python IoT project: face detection using raspberry and OpenCV Environment: Raspberry Pi camera board, openCV, python
6. BI Project: Creation & Supply of a Datawarehouse for the sales department
Environment: Talend Open Studio, Power designer, Mysql, QlikView
7. Web Scraping project: scrape all posts published on an Instagram account Environment: BeautifulSoup, Selenium
8. Project Object detection: detect people who wear a mask and who don't via a photo or video in real time
9. Environment: Convolutional Neural Network, YOLO Object Detection Algorithm, OpenCV, Google Colab

Cover Letter

Dear Sir/Madam,

I'm writing to express my interest in your Job advertisement and submit my resume for your view. As a Data Analyst, I can help develop actionable strategic insights that will help your company grow.

I have strong mathematical skills to help collect, measure, organize and analyze data; knowledge of programming languages like SQL, R, Java, and Python; proficiency in statistics and statistical packages like Excel to be used for data set analyzing; knowledge of data visualization software like Tableau; knowledge of how to create and apply the most accurate algorithms to datasets in order to find solutions.

I am a very creative person with excellent communication and presentation skills, I also have the ability for critical thinking, and I have a systematic and logical approach to problem-solving and team working skills.

I am currently looking for an opportunity where I can improve my knowledge and skills.

Thank you for taking the time to consider my application. I am available on my phone number and ready for an online interview via Zoom, Skype, WhatsApp, LinkedIn and you can contact me at the email address I have added to my CV. I hope to hear from you soon!

Sincerely,

Ismail El Haoumi
